

# Marine Data Technologies – Practical Applications for Claims and Loss Prevention

In recent years the use of marine data for incident investigation has become routine but approaches used in response to claims can also assist with loss prevention. Join us to discuss the types of available data and highlight some recent developments in the use of marine data across the insurance industry.

Topics include:

- The use of AIS data for incident investigation
- Big data for marine risk analysis
- Autonomous vessels

Please join us after the seminar for drinks.

**1 May 2019**

**Time:**

Registration: 1:45pm

Seminar: 2:00pm

Drinks: 5:30pm

**Location:**

Reed Smith  
Broadgate Tower  
20 Primrose St  
London EC2A 2RS
